PROFESSIONAL SUMMARY

MCA graduate with experience in software development and a growing focus on **Generative AI, Large Language Models, and AI Agents**. Skilled in Java, Python, React.js, Node.js, SQL, and API-based application development. Hands-on experience integrating LLMs through APIs to build AI-powered applications, with foundational knowledge of **RAG, prompt engineering, tool calling, and agentic AI workflows**.

TECHNICAL SKILLS

Programming Languages:

Java, Python, C++, JavaScript, SQL

Frontend:

React.js, HTML, CSS, Tailwind CSS

Backend:

Node.js, Express.js, REST APIs

AI / Generative AI:

LLMs, Prompt Engineering, LLM API Integration, Generative AI, AI Agents, Agentic AI Fundamentals, RAG Fundamentals, Function/Tool Calling, Embeddings, Context Management

AI Frameworks & Tools:

LangChain, LangGraph, OpenAI API, Gemini API, Anthropic API, OpenRouter, LangSmith

Databases:

MySQL, MongoDB

Development Tools:

Git, GitHub, Jupyter Notebook, Postman, VS Code

PROJECTS

1. AI Document Q&A Assistant

Python | LLM APIs | LangChain | OpenAI/Gemini API

- Developed an AI-powered document question-answering application that allows users to ask natural-language questions about uploaded documents.
- Integrated **LLM APIs** to generate contextual answers based on user queries.
- Implemented document processing and text chunking to prepare content for LLM consumption.
- Used prompt engineering techniques to improve answer relevance and maintain contextual responses.
- Designed the application with a modular architecture allowing different LLM providers to be integrated through APIs.
- Explored **RAG concepts, embeddings, vector search, and context retrieval** as part of the application's AI workflow.

2. AI Resume & Job Description Analyzer

Python | LLM APIs | OpenAI/Gemini API | Prompt Engineering

- Built an AI-powered application that analyzes resumes against job descriptions using **LLM APIs**.
- Integrated external LLM APIs to extract skills, experience, technologies, and other relevant information from resume content.
- Designed structured prompts to generate job-match analysis, missing-skill identification, and improvement suggestions.
- Implemented API-based communication between the application and LLM providers.
- Used structured LLM responses to make generated results easier to process and display within the application.
- Experimented with different prompting strategies to improve consistency and relevance of generated results.

OTHER PROJECTS

AgriGrow – Farming Web Application

React.js | Tailwind CSS | Node.js

- Developed a responsive web application for farmers using React.js and Tailwind CSS.
- Implemented reusable components and responsive layouts.
- Integrated frontend and backend APIs for application data management.

CineBook – Movie & Seat Booking System

AEM | Java | HTL | Sling Models | OSGi | JavaScript

- Developed an AEM-based movie booking application with movie listings and seat-selection functionality.
 - Created AEM components, dialogs, Sling Models, and servlets for dynamic content.
 - Implemented seat selection and booking-related frontend functionality.
 - Worked with clientlibs for managing CSS and JavaScript within AEM.
-

EDUCATION

Master of Computer Applications (MCA)

National Institute of Technology, Kurukshetra

2023 – 2026 | CGPA: 7.7/10

Class XII

71%

Class X

81%

AI & GENERATIVE AI LEARNING

- Large Language Model fundamentals
- Prompt Engineering
- LLM API integration
- Retrieval-Augmented Generation (RAG)
- Embeddings and Vector Databases
- Function/Tool Calling
- AI Agent Architecture
- LangChain & LangGraph fundamentals

- LLM evaluation and observability
 - Multi-agent system fundamentals
-

SOFT SKILLS

Problem Solving | Communication | Team Collaboration | Adaptability | Analytical Thinking
